PROFESSIONAL SUMMARY

Results-driven MIS and Business Analytics professional with 4+ years of cross-functional experience spanning data analytics, business intelligence, sales strategy, and technical liaison work between business and engineering teams. Currently serving as MIS at MAW Vriddhi, functioning as a de facto Business Intelligence Developer: independently designing executive dashboards, running sales strategy analysis (targets, market share, conversion ratios), and translating raw sales data into actionable growth recommendations for the CEO and senior leadership. Proven track record of diagnosing performance trends, writing clear technical requirements for engineering teams, and delivering polished, data-driven insights to non-technical stakeholders across marketing, sales, and operations. Skilled in Power BI, Tableau, advanced Excel, SQL, and full-stack dashboard development.

PROFESSIONAL EXPERIENCE

Management Information System (MIS) | MAW Vriddhi

2026 – Present

- Function as the company's de facto Business Intelligence Developer: independently designed and built MAW Vriddhi's full-stack sales intelligence platform (Vite, React, Supabase), live at maw-vriddhi-sales.vercel.app, with role-based login access for the Sales Head, CEO, and HODs to review live performance.
- Built automated daily email reports (sent 10 AM) summarizing key metrics and flagging priority focus areas for leadership, removing the need for manual daily report compilation.
- Oversee end-to-end MIS and sales intelligence for the Nammi Box, Nammi Vigo, and SERES electric vehicle lines, tracking the full customer journey from enquiry through booking to retail conversion.
- Drive sales strategy analysis: track targets, market share and regional market share, and conversion ratios, translating results into growth recommendations for senior management.
- Design and maintain interactive dashboards giving real-time visibility into KPIs, enquiry volumes, booking pipelines, and retail performance for senior leadership.
- Develop and manage data pipelines consolidating daily sales and enquiry data from multiple sources, ensuring accuracy and timeliness of reporting.
- Diagnose bottlenecks and drop-off patterns across the enquiry-to-retail funnel, presenting strategic sales improvement plans that contributed to measurable growth in lead-to-booking and booking-to-retail ratios.
- Act as functional bridge between sales, marketing, operations, and technical development, aligning MIS reporting and the in-house platform with business objectives and product launch timelines.

MIS Officer | Wimslab

2024 – 2026 (2 years)

- Built and maintained interactive dashboards and automated reports in Power BI and Tableau, giving management real-time visibility into operational KPIs and performance metrics.
- Tracked campaign performance across Google Ads, Meta Ads, and SEO tools; built daily, weekly, and monthly performance dashboards for marketing and management review.
- Ran data cleaning and validation across platforms to fix errors and ensure accuracy of reporting.
- Conducted trend analysis on customer behavior and ad spend, and partnered with marketing teams to evaluate ROI.
- Built and maintained data pipelines consolidating information across internal systems and reporting databases, improving data accuracy and reducing manual reporting effort.
- Conducted in-depth data analysis to identify operational inefficiencies, presenting findings and actionable recommendations to senior stakeholders.
- Developed and standardized data collection processes and reporting templates, improving consistency and reliability of business intelligence outputs.

Lead Customer Service Representative | Foodmandu

2023 – 2024

- Managed 200+ customer interactions daily across calls, chats, and emails in a high-volume food delivery environment, consistently exceeding satisfaction and resolution targets.
- Leveraged data analysis and Excel expertise to identify process inefficiencies, implementing improvements that boosted customer satisfaction scores.
- Redesigned QA evaluation strategy, introducing data-backed performance metrics that improved team accountability and quality of service delivery.
- Mentored and guided a team of customer service representatives, fostering a collaborative, high-performing work culture.

- SEO Specialist & Digital Marketing Intern | Mindrisers Institute of Technology2024
- Achieved top Google search ranking for the 'Flutter Course' keyword within 5 days of blog publication, demonstrating strong on-page SEO and content strategy skills.
 - Developed interactive website themes and content strategies aligned with brand objectives, improving user engagement and organic traffic.
 - Secured the internship position prior to course completion, demonstrating initiative and applied learning capability.
 - Demonstrated leadership potential by mentoring junior peers and nearly assuming a teaching assistant role during coursework.

- Customer Service Representative | Bhojdeals2021 – 2022
- Resolved complex customer inquiries and complaints with empathy and professionalism, ensuring timely and positive resolutions.
 - De-escalated challenging customer situations, consistently turning negative experiences into positive outcomes that retained customer loyalty.
 - Supported team lead in managing and motivating a group of customer service representatives, contributing to a positive and collaborative work environment.
